COPS MART : FOR CANTEENS

WHAT STEPS ARE INVOLVED IN STARTING THE SOFTWARE?

Work Order

After receiving the work order, we officially begin the assigned tasks. Changes required in the software can be made accordingly.

Inventory Count

Considering the initiation of online purchasing in the canteen, real-time stock availability is crucial. It aids in facilitating inventory management.

Inventory Input

All stocked items will be automatically inputted into our software. We'll also provide training to canteen staff on this process.

Staff Training

Long-term operation of the software necessitates proper training for canteen staff. We will conduct training sessions for them.

Counter Billing Start

Initially, we will introduce the billing software to canteen staff, ensuring their familiarity with it from the outset.

Problem Solving

Resolving any issues encountered by canteen staff during daily billing is our primary focus during this period.

Awareness Campaign

We'll conduct extensive promotion & training sessions on the online shopping app at as many police stations as possible.

Delivery partners

Efficient and prompt delivery after ordering from the canteen is vital. We'll endeavor to find reliable delivery partners within the city.

Cops Mart App Launch

Once everything is in place, we'll launch the Cops Mart online shopping app for police families, following approval from authorities.
